

August 3, 2010

To whom it may concern,

My husband and I had our dream master bathroom and closet done this past fall by Enterprise Contracting. It was very positive experience. This was a big project which included demoing the entire space and starting from scratch. Our favorite part of working with Enterprise was having Donna, the designer, come into our home and create a custom design for the space. She exceeded our expectations and was able to plan a new master bath and closet space that included all our requests. We saw many other designs from various contractors, but Donna's design sold us on going with Enterprise. During the process of construction, Brian, our project manager, was wonderful. We truly felt that he was looking out for our best interests during the process. He was careful to keep our home clean and was easily accessible to answer any questions we had. We now have the dream bathroom/closet that we always hoped for. I would absolutely use Enterprise again in the future for any construction project.

Sincerely,

Tammy Foley
