Enterprise Contracting Recommendation

Enterprise Contracting recently finished a complete kitchen renovation and upgrading of our adjacent family room. They did an outstanding job, resulting in the kitchen of our dreams that both draws rave reviews from all who see it and is a great working kitchen in which we love to cook and entertain.

Enterprise expeditiously completed all work, including completely gutting our old kitchen, upgrading plumbing and electrical [with added sink and additional lighting], installing all new cabinets, appliances, granite countertops and hardwood floors. Special custom work was also well done including a designer tile backsplash and a one-of-a-kind unique stainless steel railing in the family room. All work was first rate. The new cabinets were exceptionally well-constructed, handsomely finished and very fairly priced.

Enterprise used great subcontractors. Their on-site manager, Ian Loch, daily assured that all work, including work done by subcontractors, was well done and quickly resolved any of our issues or concerns.

In addition to doing outstanding quality work, Enterprise's price to us was very reasonable: we got a high-end designer kitchen at a very affordable cost.

We would highly recommend Enterprise.
