RE: Completed home improvement project

To Whom It May Concern:

I am writing to commend George Scott for the work he performed in overseeing our home improvement project and also in building the beautiful staircase. Mr. Scott is both professional and honest. I appreciated his phone calls to notify us of the day's plans and his site visits to follow through on the each day's work. Particularly during the first phase of the project, he saw that the project was completed in a smooth, timely, and continuous fashion, which produced a beautiful expansion of my living and dining rooms and a professionally finished, decorative appearance that I had sought.

Mr. Scott is a fine craftsman. The staircase turned out beautifully. The shadow boxes and raised panels were exactly what I had hoped for. I know that the staircase presented many unique challenges, such as incorporating the round white column to replace the square, dark wood column. The end product was what I had envisioned and is certainly a stunning architectural feature to my foyer.

I also wish to commend Nelson for the flooring work. The quality of his work was superlative, and I have received many compliments from neighbors and friends on the Santos mahogany floors. Overall, all of your workers were hardworking, dependable, and courteous.

I view both George and Nelson as tremendous assets to your company and its reputation and would recommend these individuals to my neighbors and friends.

Thank you.

Sincerely,

Christine Plagata-Neubauer
